Hong Kong, December 7, 2021 — Hong Kong Children's Discovery Museum has officially opened a brand new "S.T.E.A.M Play! Pop Up" in Sai Wan Ho this December, after permanently leaving both its North Point and Tsuen Wan location. Continuing our value of #learningthroughplay, the new Pop Up encourages children to explore, create and express through play. Exhibits in the Pop Up were developed with an educational goal and specially designed for children ten years old and under for their different developmental and physical stages. This Pop Up aims to spark an interest and lifelong interest of Science, Technology, Engineering, Arts, and Math (S.T.E.A.M).

New Family Hub on Hong Kong Island

HKCDM customized interactive exhibits to serve an educational purpose for children at different developmental stages, offering a play-based learning experience for children and parents. Located in Sai Wan Ho, the new "S.T.E.A.M Play! Pop Up" is approximately 1,200 square-feet. Previously well-liked exhibits, like the Water Table, from the other two locations are featured. To celebrate the opening of the new "S.T.E.A.M Play! Pop Up", HKCDM has also introduced "Nüdel Kart™", a new large educational deconstructable play cart, which is awarded with the prestigious GOOD DESIGN AWARD® in Australia. All exhibits and activities at the new Pop Up were designed from the perspective and needs of our children, which allow children to decide and take charge of their own exploration – helpful to foster their unique potential.

① **Nüdel Kart™** – This large educational deconstructable play cart is awarded the prestigious GOOD DESIGN AWARD® in Australia. It was designed with the aim to allow children to authentically develop essential skills, such as creativity, problem-solving skills, and social skills.

② **Transit Tots**

Infused with unique Hong Kong landmarks, toddlers engage their senses, while exploring mini versions of our city’s transport methods.

Small sampan: Sampan, known as sea taxi, is a major marine transportation that assists marine residents and workers to and from Aberdeen. On this small sampan, children can listen to songs and “fish” in Hong Kong’s harbor.

Tsing Ma Bridge: The Tsing Ma Bridge is a landmark in Hong Kong. It connects the Hong Kong city with the Hong Kong International Airport on Lantau Island. In Transit Tots, children can climb up and crawl on the mini-Tsing Ma Bridge and exercise their muscles.

③ **Our Natural World, Our Consumer World**

The natural world is full of mysteries, and its endless charm is amazing. Nature is closely related to our daily lives and caring for nature has become an important topic for children. Through exploring the wonders and the ways of nature, we can help protect our environment from all walks of life at an early age.

Water Table: Children can experiment to see how a dam, a water fountain, and other contraptions work. While playing, children can learn about the water cycle, water flow, and hydrodynamics.

④Tinkering Lab

Experiment with unique tools and materials to make discoveries and creations related to S.T.E.A.M. (Science, Technology, Engineering, Art, and Mathematics).

Wind Tube: Design DIY flying devices and place them in the Wind Tube to see what happens! Experiment with the physical effects of wind by testing its suspension and flight conditions.

- The End -

About Hong Kong Children’s Discovery Museum

Hong Kong Children's Discovery Museum ("HKCDM"), a member of the Association of Children's Museums, is the city's first museum dedicated to child-led learning through play. From September 2018 to February 2021, HKCDM welcomed more than 70,000 visitors and 200 school visitors before the North Point site permanently closed. During March to the end of October, HKCDM opened the first Pop Up at Tsuen Wan, which brought hands-on interactive play learning experiences to thousands of people from different families, schools and communities. In December 2021, “S.T.E.A.M Play!” Pop Up launched in Sai Wai Ho, while we are preparing to open a new permanent museum in the near future. HKCDM promotes child-led learning experience which encourages adults to let children lead their own learning experience and exploration. Everyone from 0 to 100 years old is welcome to visit HKCDM’s “S.T.E.A.M Play!” Pop Up for life-long learning across generations!
